Dental Office Interiors 101

## **How can your office help patients relax?**

Soft lighting and color schemes, varied textures and nature based art help focus the patient on external, soothing elements. New compact fluorescent lighting with daylight color range and innovative low voltage products create comfortable, hospitality oriented space. We've included some great new lighting products that you may want to consider for patient comfort and energy efficiency.

Dental Office Designers ([www.dentalofficedesigners.com](http://www.dentalofficedesigners.com)), is a division of PLDA Interiors.
